

# Home Snow

## Snow for everyone

**Bächler Home Snow is small, portable snowmaking system for private clients, hotels and clubs. You can also enjoy the white landscape even when the weather god makes a short break.**

Available in two versions, the Bächler Home Snow Standard or BIG provides a real winter feeling. A Home Snow-system consists of a lance unit, a standard high-pressure cleaner and a mini compressor. Of course, the high-pressure cleaner and the compressor can also be used for their original purpose.

Starting from  $-1^{\circ}\text{C}$  air temperature with 50% of air humidity a snow production is possible. Is the air humidity even deeper you can start earlier. Depending on the version a snowproduction between  $1 - 2.5 \text{ m}^3$  of snow per hour can be achieved. The lance is positioned using the optionally available parasol stand or screw foundation. Multifunctional, portable and simple in using this is the Bächler Home Snow-system.

## Technical Specifications

	Standard	BIG
<b>Lances</b>		
Lance lengths	3 m	3 m
Lance water hose	3 m	3 m
Lance air hose	3 m	3 m
Tilt	adjustable	adjustable
Start snowing	-1.0° at 50% air humidity	-1.0° at 50% air humidity
Snowing performance	up to 1 m <sup>3</sup> /h	up to 2.5 m <sup>3</sup> /h
<b>High-pressure cleaner</b>		
Electrical connection	230 V / 50 Hz	400 V / 50 Hz CEE16
Power consumption	2.2 kW	9.2 kW
Work pressure	50 - 115 bar	30 - 250 bar
Water pumping rate	500 l/h	1000 l/h
Weight	15 kg	75 kg
<b>Air compressor</b>		
Electrical connection	230 V / 50 Hz	230 V / 50 Hz
Power consumption	0.56 kW	0.56 kW
Work pressure	8 - 10 bar	8 - 10 bar
Air pumping rate	85 l/min	85 l/min
Weight	22 kg	22 kg
