# SNOW AND TRANSPORT HOSES

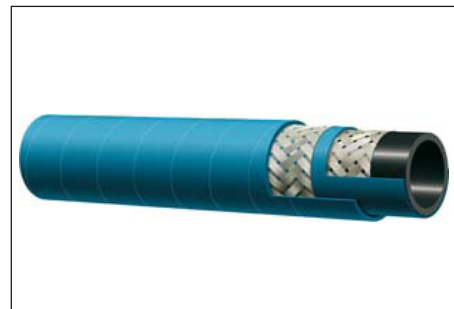

## Snow hose TOP SNOW

Our approved and high quality heavy-duty snow hose for low-pressure, high-pressure and lance-snowmaking-systems. 2 year warranty (by convenient and correct handling).

High-pressure hoses - the ideal enduring connection between water plug and snowmaker, casing in SBR/EPDM quality, cold-, ozone-, abrasion resistant and dimensionally stable. 2-4 high pressure rayon-cord interlinings (material canvas without a memory effect by bending, it's an advantage compared to the hoses with steel core), inside rubber flat.

### Technical data:

Individual lengths: 0.5 m - 60 m ready-made  
 Assembly: free configuration of the KAMLOK coupler: 1.5", 2", m/f, m/m, f/f  
 Colour: blue

Connection hoses

## Transport hose SNOWSTORM

PU coated transport hose in double fabric construction.

### Application:

- Transport hose for snowmaking systems

### Main advantages:

- High continuous duty pressure, sufficient buffers for pressure peaks
- Good visibility in the area also in the dawn
- Very abrasion-resistant, robust and persistent
- Resistant to age, UV and ozon
- Very good coldness flexibility

### Technical data:

Available lengths: 10, 20, 30, 40, 50 and 60 m  
 Assembly: each with 1.5", 2" oder 2.5" m/f KAMLOK couplers  
 Colour: orange
